- The candidate should be an excellent communicator and able to present ideas clearly and effectively both internally and externally;
- Candidates should be highly motivated and capable of the development and application of skills in new and existing technologies;
- Willingness to travel is essential in this position.

Key Skills

The successful candidate will possess the following skillset;

- Excellent communication skills (both spoken and written English);
- Excellent analytical skills;
- Excellent knowledge of SQL language;
- Understanding of double-entry bookkeeping;
- Knowledge of ERP systems ;
- Hands-on experience with database design;
- Hands-on experience with ETL; experience creating SSIS packages;
- Hands-on experience with Microsoft SQL Server Analysis Services; experience creating OLAP Cubes;
- Hands-on experience with business intelligence and analytical reporting tool;
- Expertise in SQL Server Reporting Services;
- Expertise in Crystal Reports or Business Objects;
- Experience with programming – C#/VB.NET, ASP.NET, VB6, PowerShell, JavaScript, XSLT;
- Experience in analyzing business user requirements;
- Experience with enterprise reporting solutions (i.e. Microsoft Power BI);
- Detail-oriented, organized, and with a positive attitude to work.

The following skills/experience is a plus:

- Experience with business accounting systems (i.e. Exact Globe);
- University degree in electrical engineering / computer science.

Job Duties

The candidate will be responsible for execution of following duties:

- Create, integrate and test software systems or applications for software enhancements or new products;
- Enhance, maintain and support existing applications and data warehouse solution and prepare technical documentation;
- Combine data from a variety of business systems and implement business rules via stored procedures, middleware, or other technologies;
- Create plans, test files, and scripts for software solutions / data warehouse testing, ranging from unit to integration testing.

The Benefits

Become part of a successful, dynamic team delivering solutions to our customers which in turn will deliver business benefit therefore enhancing our customer's performance. In return the position offers a very competitive salary & benefits package.
